A testament to a rich but often overlooked part of history, this work captures the stories of barrier-breaking African American pioneers in all fields—arts, entertainment, business, civil rights, education, government, inventing, journalism, religion, science, sports, and more. With hundreds of illustrations and a daily calendar of firsts, this chronicle reveals stories of those who overcame adversity to emerge triumphant and celebrates those who have won personal victories against

the forces arrayed against them. A vital collection of more than 4,000 entries, this book is proof that the celebration of African American accomplishments is ongoing.

Armageddon Now: The End of the World A to Z

Jim Willis and Barbara Willis

So you don't believe we're on the eve of destruction? Authors Jim and Barbara Willis mine the religious and secular divide as they examine the history of apocalyptic beliefs in *Armageddon Now*. The authors explain the various omens and prophecies as well as the actual events that may trigger the end, such as collisions with asteroids, nuclear war, the oil crisis, global warming, and famine. Predicting the order of finish kept Nostradamus in print for centuries, and the ancient Mayans helpfully projected that calendar sales would drop to nothing after 2012. They are all part of the long history on the end of history.
